

**Announcement of Rajamangala University of Technology Srivijaya
on Solid Waste Reduction and Separation Standards
A.D. 2022**

Rajamangala University of Technology Srivijaya has an explicit policy and guidelines for implementing management the reduction and separation system of solid waste. Considering on the staff are able to preliminary check and tackle the potentials problems by following the proper procedures. The following standards for solid waste reduction and separation have been set:

1. Using sparingly or as needed or avoiding extravagantly use.
2. Reusing materials or products.
3. Sorting and collecting materials for new production processes.
4. Arrangement of solid waste separation to be properly managed without causing the sorted waste to be rejoined.
5. Providing noticeable sign of various solid waste type to allow users to dispose solid waste properly.

Rajamangala University of Technology Srivijaya will allow relevant people to implement the system, inspect, and evaluate the results of solid waste reduction and separation by collecting data, recording, and reporting periodically.

Announced on November 4, 2022

(Prof. Dr. Suwat Tanyaros)

President of Rajamangala University of Technology Srivijaya
